

BERMAD Fire Protection

BP Thunder Horse Platform

Project Name	BP Thunder Horse Platform - 2002
Country	U.S.A.
Segment	Fire Protection
Application	On-Off Deluge Valve
Bermad Solution	FS-700E-3D Electrically Controlled Deluge Valves, Marine Bronze
Optional Text	Location: Gulf of Mexico, Louisiana. Protection of the BP "Flag ship" Thunder Horse drilling platform. When built the Thunder Horse semi-submersible drilling and production facility was about 50 percent larger than the next largest floating semi-submersible rig in the world. It can process 250,000 barrels of oil and 200 million cubic feet of natural gas per day enough energy to provide for 6.5 million American homes. It cost around \$5 billion.
