

## High Pressure Strainer Model BC-80F-P

The BERMAD BC-80F-P Strainer is designed to protect the pipeline and valves from large foreign objects, such as sticks and stones.

It is recommended to install the Strainer upstream from control valves, flow meters and other system components.

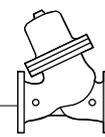

Pressure Reducing Station, featuring BERMAD BC-80F-P Strainers to protect each branch from foreign debris, a redundant, parallel branch to minimize the possibility of total water shut-off and a low flow bypass branch for low demand operation. For information on the other BERMAD products in this system please see the product data sheet for the following components: BERMAD BC-820-PD-P, BERMAD BC-720-P and BERMAD BC-73Q-P.

### Typical Application

- Protects control valves against damaging debris.

**NOTE:** The BERMAD BC-80F-P Strainer is designed for high operating pressures. For lower operating pressures, consider the BERMAD BC-70F-P Strainer.
